WORKING

APPLICATION TO APPROPRIATE WATER

APPLICATION No. 31208
(Leave Blank)

1. APPLICANT

SLEEPY VALLEY WATER COMPANY (661) 722-7225 (HANSEN CONSULTING)
(Name of applicant) (Telephone - between 8 a.m. and 5 p.m.)

CA PROPERTY OWNER HELD - NOT FOR PROFIT CORP. (213) 251 4585

PO BOX 2721 CANYON COUNTRY CA 91386-7221
(Mailing address) (City or town) (State) (Zip code)

2. SOURCE

a. The name of the source at the point of diversion is "UNDERFLOW" OF MINT CANYON CREEK
(If unnamed, state that it is an unnamed stream, spring, etc.)

tributary to THE SANTA CLARA RIVER

b. In a normal year does the stream dry up at any point downstream from your project? YES ☒ NO ☐
If yes, during what months is it usually dry? From MARCH to DECEMBER
What alternate sources are available to your project should a portion of your requested direct diversion season be excluded because of a dry stream or nonavailability of water? NONE

3. POINTS of DIVERSION and REDIVERSION

a. The point(s) of diversion will be in the County of LOS ANGELES

b.

List all points giving coordinate distances from section corner or other tie as allowed by SWRCB regulations i.e. California Coordinate System	Point is within (40-acre subdivision)	Section	Township	Range	Base and Meridian
TWO EXISTING WELLS	NE ¼ of NE ¼	20	5N	14W	SB
PROPERTY IS A PORTION OF LOT 185 OF	¼ of ¼				
TRACT # 7773 - APN 3214-36-55	¼ of ¼				

(SEE ATTACHMENTS (1) MAP)

c. Does applicant own the land at the point of diversion? YES ☒ NO ☐

d. If applicant does not own the land at point of diversion, state name and address of owner and what steps have been taken to obtain right of access: N/A

RECD 1/16/01

SLEEPY VALLEY

4. PURPOSE of USE, AMOUNT and SEASON

a. In the table below, state the purpose(s) for which water is to be appropriated, the quantities of water for each purpose, and the dates between which diversions will be made. Use gallons per day if rate is less than 0.025 cubic foot per second (approximately 16,000 gallons per day).

PURPOSE OF USE (Irrigation, Domestic, etc.)	DIRECT DIVERSION				STORAGE		
	QUANTITY		SEASON OF DIVERSION		AMOUNT	COLLECTION SEASON	
	RATE (Cubic feet per second or ~~gallons per day~~)	AMOUNT (Acre-feet per year)	Beginning Date (Mo. & Day)	Ending Date (Mo. & Day)	Acre-feet per annum	Beginning Date (Mo. & Day)	Ending Date (Mo. & Day)
~~DOMESTIC~~	0.14	100	1/1	12/31		N/A	
Municipal	0.21						

b. Total combined amount taken by direct and storage during any one year will be 100 acre-feet.

5. JUSTIFICATION of AMOUNT

a. IRRIGATION: NOT APPLICABLE FOR THIS APPLICATION Maximum area to be irrigated in any one year is _____ acres.

CROP	ACRES	METHOD OF IRRIGATION (Sprinklers, flooding, etc.)	ACRE-FEET PER YEAR	NORMAL SEASON	
				Beginning Date	Ending Date
N/A					

b. DOMESTIC: Number of residences to be served is ~~61-100~~. Separately owned? YES ☒ NO ☐
Total number of people to be served is ~~185-300~~. Estimated daily use per person is ~~100 INDOORS~~ (Gallons per day)
Total area of domestic lawns and gardens is 900,000 ± square feet.
Incidental domestic uses are ~~YARDS, DOGS 20-40 HORSES ETC.~~
(Dust control area, number and kind of domestic animals, etc.)

c. STOCKWATERING: Kind of stock N/A Maximum number _____
Describe type of operation: _____

d: RECREATIONAL: N/A Type of recreation: Fishing ☐ Swimming ☐ Boating ☐ Other ☐

e. MUNICIPAL: (Estimated projected use)

POPULATION 5-Years periods until use is completed		MAXIMUM MONTH		ANNUAL USE		
PERIOD	POP.	Average daily use (gal. per capita)	Rate of diversion (cfs)	Average daily use (gal. per capita)	Acre-foot (per capita)	Total acre feet
Present	~~Est~~ 183	~~350~~ 450	0.12 , .13	300	0.33	61
5 yr	75 225	"	0.13 , .15	"	"	75
10 yr	84 252	"	0.13 , .18	"	"	84
15 yr	100 300	"	0.14 , .21	"	"	100

Month of maximum use during year is AUGUST. Month of minimum use during year is FEBRUARY.

SLEEPY VALLEY

7. DIVERSION WORKS

a. Diversion will be by gravity by means of N/A
(OF "UNDERFLOW") (Dam, pipe in unobstructed channel, pipe through dam, siphon, weir, gate, etc.)

b. Diversion will be by pumping from 2 WELLS WHOSE (Sump, offset well, channel, reservoir, etc.) Pump discharge rate 43200 GPD EA (cfs or gpd) Horsepower 3 HP EA

c. Conduit from diversion point to first lateral or to offstream storage reservoir:

CONDUIT (Pipe or channel)	MATERIAL (Type of pipe or channel lining) (Indicate if pipe is buried or not)	CROSS SECTIONAL DIMENSION (Pipe diameter or ditch depth and top and bottom width)	LENGTH (Feet)	TOTAL LIFT OR FALL		CAPACITY (Estimate)
				Feet	+ or -	
PIPE	C 900 PVC	4"	1,950'	75'	+	

d. Storage reservoirs: (For underground storage, complete Supplement 1 to APP, available upon request.)

Name or number of reservoir, if any ?	DAM				RESERVOIR (TWO STEEL TANKS)		
	Vertical height from downstream toe of slope to spillway level (ft.)	Construction material	Dam length (ft.)	Freeboard Dam height above spillway crest (ft.)	Approximate surface area when full (acres)	Approximate capacity (acre-feet)	Maximum water depth (ft.)
TANK A	N/A	—	—	—	100 000	gallons	24
TANK B	N/A	—	—	—	100,000	gallons	24

e. Outlet pipe: (For storage reservoirs having a capacity of 10 acre-feet or more.) N/A

Diameter of outlet pipe (inches)	Length of Outlet pipe (feet)	FALL (Vertical distance between entrance and exit of outlet pipe in feet)	HEAD (Vertical distance from spillway to outlet pipe in reservoir in feet)	Estimated storage below outlet pipe entrance (dead storage)

f. If water will be stored and the reservoir is not at the point of diversion, the maximum rate of diversion to offstream storage will be 0.14 cfs. Diversion to offstream storage will be made by: ☒ Pumping ☐ Gravity

8. COMPLETION SCHEDULE

THIS APPROPRIATION HAS BEEN OCCURRING SINCE 1926. SYSTEM IMPROVEMENTS WILL START SOON, HOWEVER APPROPRIATION AMOUNT WILL REMAIN RELATIVELY STABLE BOTH BEFOR & AFTER SYSTEM IMPROVEMENTS.

a. Year work will start _____ b. Year work will be completed _____

c. Year water will be used to the full extent intended 2015 d. If completed, year of first use 1926

9. GENERAL

a. Name of the post office most used by those living near the proposed point of diversion is AGUA DULCE
Does any part of the place of use comprise a subdivision on file with the State Department of Real Estate? YE ☒ N ☐
If yes, state name of the subdivision TRACT 7773 (RECORDED IN 1926)
If no, is subdivision of these lands contemplated? YES ☐ NO ☒
Is it planned to individually meter each service connection? YES ☒ NO ☐ If yes, when? NOW METERED

b. List the names and addresses of diverters of water from the source of supply downstream from the proposed point of diversion: WE ARE UNAWARE OF ANY "DIVERTERS" DOWNSTREAM. (CONFUSING QUESTION – DOWNSTREAM COULD MEAN 40± MILES TO THE OCEAN, WE DON'T KNOW HOW TO RESPOND.)

c. Is the source used for navigation, including use by pleasure boats, for a significant part of each year at the point of diversion, or does the source substantially contribute to a waterway which is used for navigation, including use by pleasure boats? YES ☐ NO ☒ If yes, explain SURFACE STREAM DRIES UP MOST OF YEARS DOESN'T FLOW AT ALL IN DRY YEARS. BOATING IS OUT OF THE QUESTION.

SLEEPY VALLEY

10. EXISTING WATER RIGHT

Do you claim an existing right for the use of all or part of the water sought by this application? YES ☐ NO ☐
If yes, complete table below: DO,

Nature of Right (riparian, appropriative, groundwater	Year of First Use	Purpose of use made in recent years including amount, if known	Season of Use	Source	Location of Point of Diversion
APPROPRIATIVE	1926	DOMESTIC	ALL YEAR	UNDERFLOW OF MINT CANYON CREEK	INTERSECTION OF STEELE AVE & SIERRA HIGHWAY

11. AUTHORIZED AGENT (Optional)

With respect to ☒ all matters concerning this water right application ☐ those matters designated as follows:

DAVID W HANSEN, PE

HANSEN CONSULTING (661) 722 7225
(Name of agent) (Telephone number of agent between 8 a.m. and 5 p.m.)

6067 MIRKWOOD CT PALMDALE CA 93551
(Mailing address) (City or town) (State) (Zip code)

is authorized to act on my behalf as my agent.

12. SIGNATURE OF APPLICANT

I (we) declare under penalty of perjury that the above is true and correct to the best of my (our) knowledge and belief.

Dated NOV 20 19 2000, at PALMDALE, California

~~Ms.~~ Mr.
~~Miss/Mrs.~~

(Signature of applicant)

ROBERT BAKER, BOARD PRESIDENT
SLEEPY VALLEY WATER COMPANY

(If there is more than one owner of the project, please indicate their relationship.)

Ms. Mr.
Miss. Mrs.

(Signature of applicant)

Additional information needed for preparatin of this application may be found in the Instruction Booklet entitled "HOW TO FILE AN APPLICATION TO APPROPRIATE WATER IN CALIFORNIA". If there is insufficient space for answers in this form, attach extra sheets. Please cross-reference all remarks to the numbered item of the application to which they may refer. Send original application and one copy to the STATE WATER RESOURCES CONTROL BOARD, DIVISION OF WATER RIGHTS, P.O. Box 2000, Sacramento, CA 95812-2000, with $100 minimum filing fee.

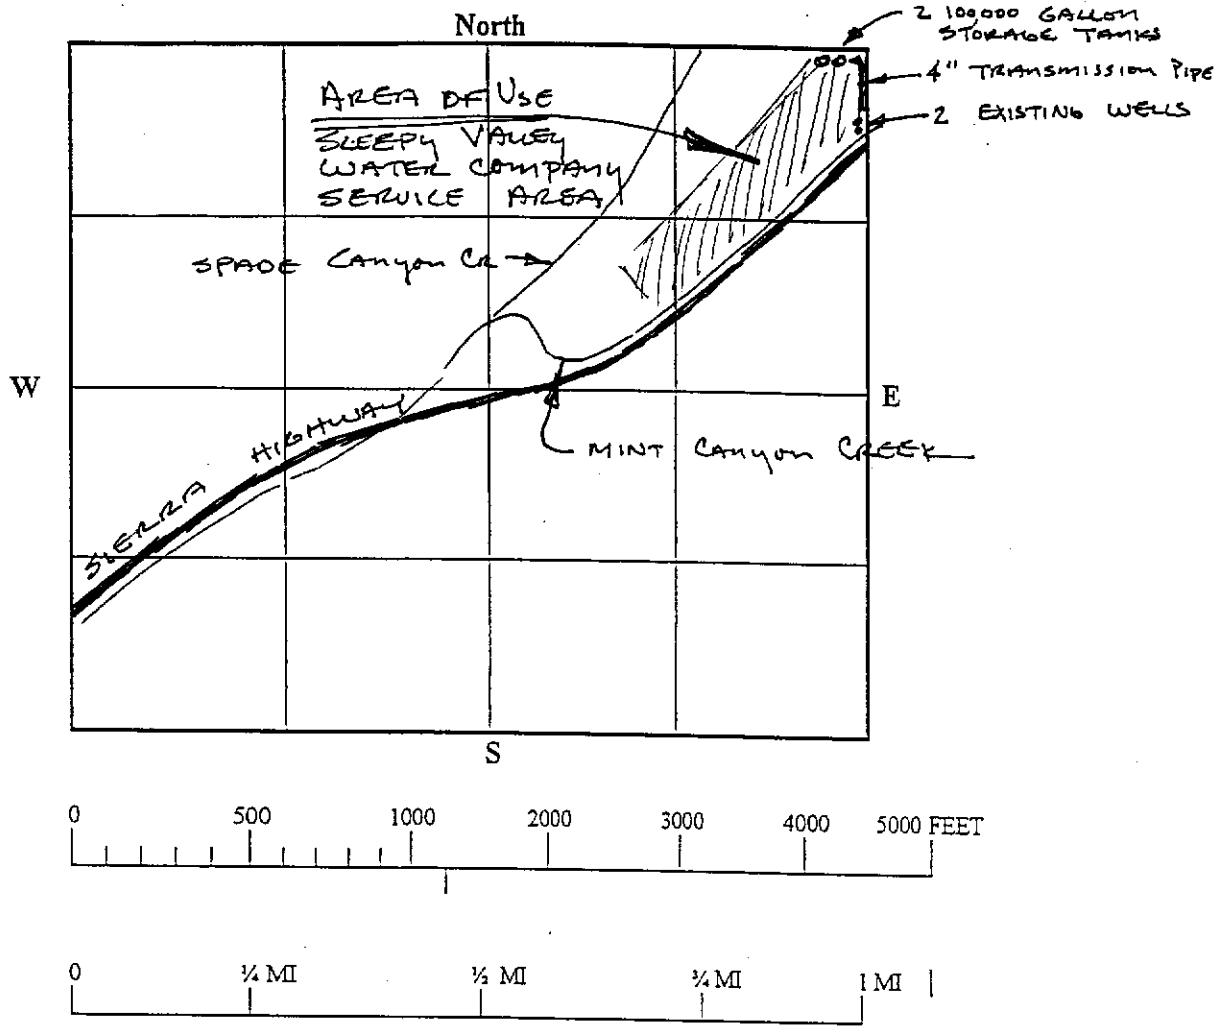
NOTE:
If this application is approved for a permit, a minimum permit fee of $100 will be required before the permit is issued.

SLEEPY VALLEY

13. MAP

(Please complete legibly, with as much detail as possible, or attach a suitable alternative. See example in instruction booklet.)

SECTION(S) 20 TOWNSHIP 5 N RANGE 14 W, SB B. & M.



T, 80,000 / 1,750 / 417.250

4,300,800 / 299.200

(1) Show location of the stream or spring, and give name.
(2) Locate and describe the point of diversion (i.e. the point at which water is to be taken from the stream or spring) in the following way: Begin at the most convenient known corner of the public land survey, such as a section or quarter section corner (if on unsurveyed land more than two miles from a section corner, begin at a mark or some natural object or permanent monument that can be readily found and recognized) and measure directly north or south until opposite the point which it is desired to locate; then measure directly east or west to the desired pint. Show these distances in figures on the map as shown in the instructions.
(3) Show location of the main ditch or pipeline from the point of diversion.
(4) Indicate clearly the proposed place of use of the water.

14. SUPPLEMENTAL INFORMATION

a. If you are applying for a permit, Environmental Information form APP-ENV should be completed and attached to this form.
b. If you are applying for underground storage, supplemental to APP (available upon request) should be completed and attached to this form.

APPLICATION TO APPROPRIATE WATER BY PERMIT
ENVIRONMENTAL INFORMATION

(THIS IS NOT A CEQA DOCUMENT)

SLEEPY VALLEY WATER COMPANY

APPLICATION NO. 31208

The following information will aid in the environmental review of your application as required by the California Environmental Quality Act (CEQA). IN ORDER FOR YOUR APPLICATION TO BE ACCEPTED AS COMPLETED, ANSWERS TO THE QUESTIONS LISTED BELOW MUST BE COMPLETED TO THE BEST OF YOUR ABILITY. Failure to answer all questions may result in your application being returned to you, causing delays in processing. If you need more space, attach additional sheets. Additional information may be required from you to amplify further or clarify the information requested in this form.

PROJECT DISCRIPTION (sic.)

1. Provide a description of your project, including but not limited to, type of construction activity, structures existing or to be built, area to be graded or excavated and project operation, including how the water will be used.
   - ☐ Replace the existing 24,000-gallon water storage tank that fully encroaches on otherwise unused public road Rights-of-Way, and 12,000-gallon water storage tank, with two new 100,000-gallon tanks, one of which will partly encroach on the otherwise unused public road Rights-of-Way.
     - This will include replacing on-site buried piping for connection to new Transmission and Distribution Piping.
     - The surface of the site will be excavated to about one foot and re-compacted. Then a layer of gravel will be added (within a retainer band) as a surface for each tank to set upon.
     - Move or replace an existing 80ft^2 shed to a new location on the site.
     - Alter fences as necessary.
     - The area of the tank site, including encroached public road Rights-of-Way is about 1/8 acre.
   - ☐ Build a new 100ft^2 Raw Water Treatment facility building on the tank site.
   - ☐ Modify the existing well site to raise its surface above the 10-year flood level, in conjunction with extending the tops of the two existing wells. The area of the well site to be altered is about 1,600ft^2, the remainder of the site is creekbed. These modifications include:
     - Build retaining walls on three sides of the site.
     - Extend the tops of the well casings and the pump columns accordingly.
     - Fill and compact.
     - Move and/or replace the well sheds and controls.
     - Alter fences as necessary.
   - ☐ Acquire a new well site.
     - The new site will have a test well drilled.
     - If the test well is acceptable, a production well of about 25 to 30gpm capacity will be developed on the site.

Rec'd 1-16-01

- ❑ Replace the existing transmission pipeline.
  - o Install about 1,950 feet of 4" PVC transmission pipeline (with 48" of cover) from the two well sites to the tank site in public road Rights-of-Way.
- ❑ Replace the existing Distribution pipe system.
  - o Install about 4,290 feet of 6" PVC water main (with 48" of cover).
  - o Install about 3,230 feet of 8" PVC water main (with 48" of cover).
  - o Install about 930 feet of 10" PVC water main (with 48" of cover).
  - o Install two water mains, 80 feet long each (with 48" of cover), across Sierra Highway.
  - o Install ten new fire hydrants.
  - o Replace existing service connections and meters with connections to the new mains (replacement includes necessary valves and fittings).

GOVERNMENTAL REQUIREMENTS

Before a final decision can be made on your water right application, we must consider the information contained in an environmental document prepared in compliance with the requirements of CEQA. If an environmental document has (not?) been prepared, a determination must be made as to who is responsible for the preparation of the environmental document for your project. The following questions are designed to aid us in that determination.

2. Contact your county planning or public works department for the following information:

   a. Person contacted Shawn Skeries Date of contact 10/26/2000

      Department Regional Planning Telephone (661) 723-4476

   b. Assessor's Parcel No. 1. Tank Site: 3214-30-43

      2. Well Site: 3214-36-55

      3. Distribution and Transmission Piping in streets within Tract #7773

   c. County Zoning Designation: A1

   d. Are any county permits required for your project? Yes.
      If yes, check appropriate space below:
      _____ Grading Permit, _____ Use Permit,
      _____ Watercourse Obstruction Permit, _____ Change of Zoning,
      _____ General Plan Change, ___X___ Other (explain):

      - ❑ Encroachment Permit for continued use of otherwise unused public road Rights-of-Way for tank location are being sought at this time.
      - ❑ Well Permit for new well.

   e. Have you obtained any of the required permits described above? No

      If yes, provide a complete copy of each permit obtained. The Encroachment Permit has been applied for, but not yet issued. The County Health Department Well Permit for the new well will be applied for once the State DOHS funding is available.

3. Are any additional state or federal permits required for your project? No (i.e., from Federal Energy Regulatory Commission, U.S. Forest Service, Bureau of Land Management, Soil Conservation Service, Department of Water Resources (Division of Safety of Dams), Reclamation Board, Coastal Commission, State Lands Commission, etc.). For each agency from which a permit is required provide the following information:

   Permit type N/A

Person (s) contacted _____ Agency _____

Date of contact _____ Telephone _____

4. Has any public agency prepared an environmental document for any aspect of your project?
No.

If so, please submit a copy of the latest environmental document (s) prepared, including a copy of the notice of determination adopted by the public agency.

If not, explain below whether you expect that a public agency other than the State Water Resources Control Board will be preparing an environmental document for your application or whether the applicant, if it is a California public agency, will be preparing the environmental document for your project:

We do not expect any other agency to prepare an Environmental Report on this project as it is exempt under Title 22, 60101, Class 2 (replacement of existing facilities) and Class 3 (new pipeline of less than 16" diameter).

Note: When completed, please submit a copy of the final environmental document (including notice of determination) or notice of exemption to the State Water Resources Control Board. Processing of your application cannot proceed until such documents are submitted.

5. Will your project, during construction or operation, generate waste or wastewater containing such things as sewage, industrial chemicals, metals, or agricultural chemicals, or cause erosion, turbidity or sedimentation? No. If so, explain: _____

If yes or you are unsure of your answer, contact your local Regional Water Quality Control Board for the following information (see attachment for address and telephone number):

Will a waste discharge permit be required for your project? No

Person contacted _____ Date of contact _____

What method of treatment and disposal will be used? _____

6. Have any archeological reports been prepared on this project, or will you be preparing an archeological report to satisfy another public agency? No.

Do you know of any archeological or historic sites located within the general project area?

No. If so, explain: _____

ENVIRONMENTAL SETTING

6. Attach **THREE COMPLETE SETS** of color photographs, clearly dated and labeled, showing the vegetation currently existing at the following locations:

a. Along the stream channel immediately downstream from the proposed point(s) of diversion.

b. Along the stream channel immediately upstream from the proposed point(s) of diversion.

c. At the place(s) where the water is to be used.

Note: It is very important that you submit no less than three complete sets of photographs as required above. If less than three sets are submitted, processing of your application will be delayed until you furnish the remaining sets!

8. From the list given below, mark or circle the general plant community types which (sic) best describe those which (sic) occur within you (sic) project area (Note: See footnote denoted by * under Question 11 below):

Tree Dominated Commuinities (sic)
Subalpine Conifer
Red Fir
Lodgepole Pine
Mixed Conifer
Sierran Mixed Conifer
White Fir
Klamath Mixed Conifer
Douglas-Fir (sic)
Jeffrey Pine
Ponderosa Pine
Eastside Pine
Redwood
Pinyon-Juniper
Juniper
Aspen
Closed-Cone Pine-Cypress
Montane Hardwood-Conifer
Montane Hardwood
Valley Foothill Hardwood
Blue Oak Woodland
> **Valley Oak Woodland**
Coastal Oak Woodland
Valley Foothill Hardwood-Conifer
Blue Oak-Digger Pine
Eucalyptus
Montane Riparian
Valley Foothill Riparian
Desert Riparian
Palm Oasis
Joshua Tree

Shrub Dominated Communities
Alpine Dwarf-Shrub
Low Sage
Bitterbrush
Sagebrush
Montane Chaparral
> **Mixed Chaparral**
Chamise-Redshank Chaparral
Coastal Scrub
Desert Succulent Shrub
Desert Wash
Desert Scrub
Alkali Desert Scrub
Herbaceous Dominated Communities
Annual Grassland
Perennial Grassland
Wet Meadow
Fresh Emergent Wetland
Saline Emergent Wetland
Pasture
Aquatic Communities
Riverine
Lacustrine
Estuarine
Marine
> **Developed Communities**
Cropland
Orchard-Vineyard
Urban

Literature source: Mayer, K. E., and W. F. Laudenslayer, Jr. (sic), (eds.) 1988, "A Guide to Wildlife Habitats of California", California Department of Forestry and Fire Protection, Sacramento, 166 pp. (Note: you may view a copy of this document qt (sic) our public counter at the address given at the top

of this form (sic ... nb: address is a PO Box); or you may purchase a copy by calling the California Department of Fish and Game, Wildlife Habitat Relationships (WHR) Program at (916) 653-7203 [nb: (916) 327-8746 is currently correct]).

9. Provide below an estimate of the type, number, and size (trunk/stem diameter at chest height) of trees and large shrubs that are planned to be removed or destroyed due to implementation of the proposed changes. Consider all aspects of your application, including changes in diversion structures, water distribution and use facilities, and changes in the place of use due to additional water development.

   One 6" eucalyptus on the tank site will need to be removed. Other, larger trees are to remain on the site unchanged. Plans include planting other similar trees on the site.

FISH AND WILDLIFE CONCERNS

10. Identify the typical species of fish which (sic.) occur in the source(s) from which you propose to divert water and discuss whether or not any of these fish species or their habitat has been or would be affected by your proposed changes (Note: See footnote denoted by * under Question 11 below):

    The source used by the applicant is the underflow of a stream that flows at the surface as a seasonal stream at the most. No species of fish normally inhabit this stream. Construction crossing the creekbed will be planned for seasons when the stream is not expected to be flowing at the surface. One of the two crossings will consist of inserting a 6" pipe under the 4' concrete drain pipes under a roadway. The other will consist of a 6" pipe inserted under a 4' concrete box culvert at the edge of a road. Neither will result in the disruption of the streambed. As the water diverted for this project is from the underflow of the stream, and that diversion has taken place under permit for many decades, there will be no impact upon aquatic species inhabiting the area.

11. Identify the typical species of riparian and terrestrial wildlife in the project area and discuss whether or not any of these species and/or their habitat has been or would be affected by your project through

construction of water diversion and distribution works and/or changes in the place of water use. (Note: See footnote denoted by * below):

Coyotes, jackrabbits, cottontail rabbits, various squirrels, etc. comprise the dominant terrestrial species in the area. Riparian species include some toads, perhaps some others. The habitat of these and any others will not be altered by construction or operation of this project; as the project is replacement of facilities that have been in place for decades. The project area is suburban/rural, developed decades ago.

*Note: The purposes of Question 10 and 11 are (sic) to provide a preliminary assessment of the presence of typical plant and animal species in the area and whether these species might be affected by your project. Detailed site surveys to quantify populations of specific species or determine the presence of rare or endangered species may be required at a later date. It is very important that you answer these questions accurately. If you are unable to obtain appropriate answers from your local California Department of Fish and Game biologists (see attachment for address and telephone number) or you do not have adequate information or expertise to complete your answers, you should hire a fishery consultant and/or a wildlife consultant to review your project and prepare suitable answers for you. For information on available qualified fishery or wildlife consultants near you, consult your local telephone directory yellow pages under Environmental and Ecological Services, or call the California Environmental Protection Agency, Registered Environmental Assessor (REA) Program, at (916) 324-6881 or the University of California, Cooperative Extension Service (see your local telephone directory white pages).

12. Does your proposed project involve any construction or grading-related activity which (sic.) has significantly altered or would significantly alter the bed or bank of any stream or lake?
No.

If so, explain: See answer for #10 above.

CERTIFICATION

I hereby certify that the statements I have furnished above and in the attached exhibits are complete to the best of my ability, and that the facts, statements, and information presented are true and correct to the best of my knowledge.

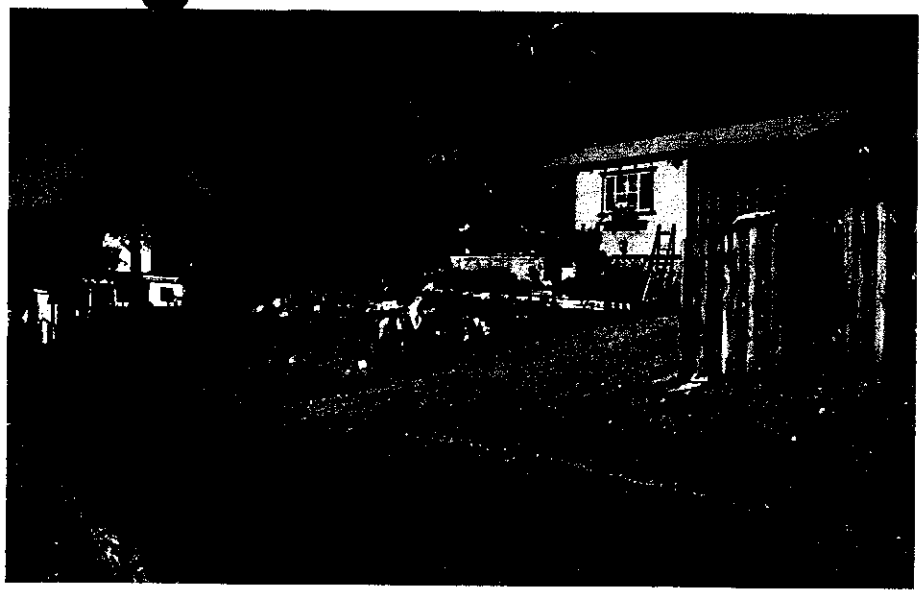
Date 11/10/2000 Signature _____

Valley Oak woodland on private property within service area.

This page shows native vegetation in area.
All these photos taken 10/31/2000.

Native oaks on residential property in service area.

Tank site on left, adjacent native vegetation on far side of railing.

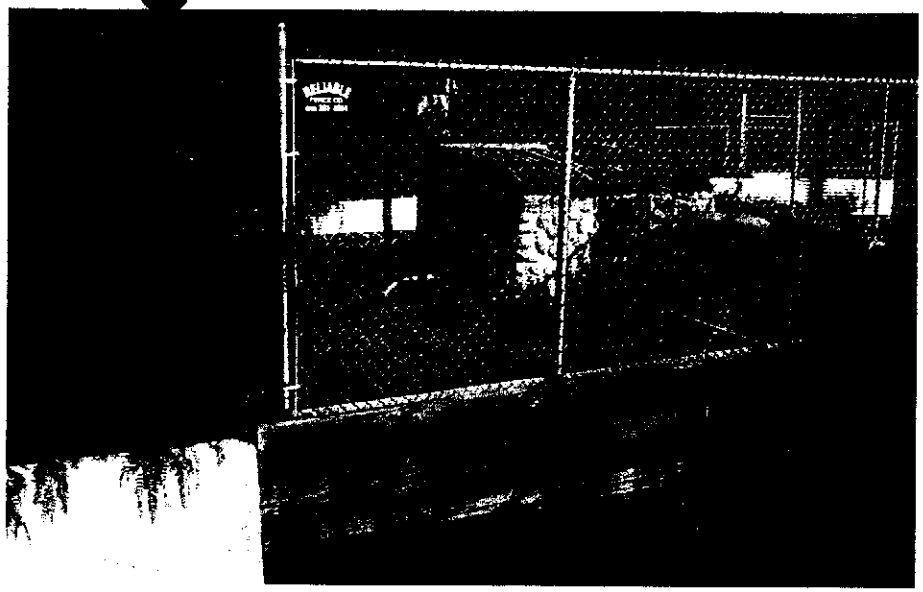


Typical residential user in service area. Reservoir St. near Center Ave.

Spring St. looking south (note the chaparral covered hillside across the canyon).

Reservoir St. near Center St., looking east.
All these photos taken 10/31/2000.

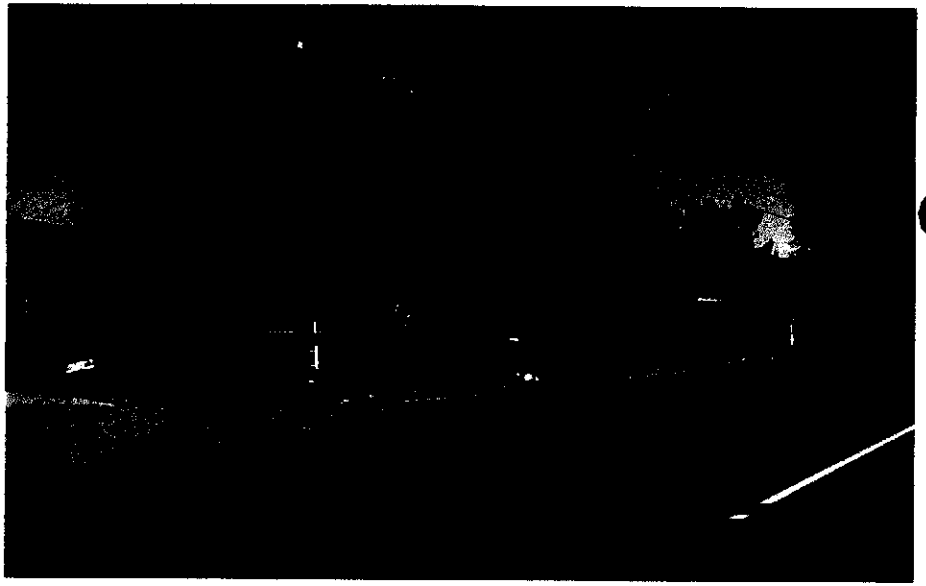
Typical residential user. Native vegetation on slope at right.
This page shows area of water use.



Well site from stream channel. Pump house past fence. Upstream to right.

Well site and adjacent stream channel. The pipeline will cross under the drain pipes in the roadway.

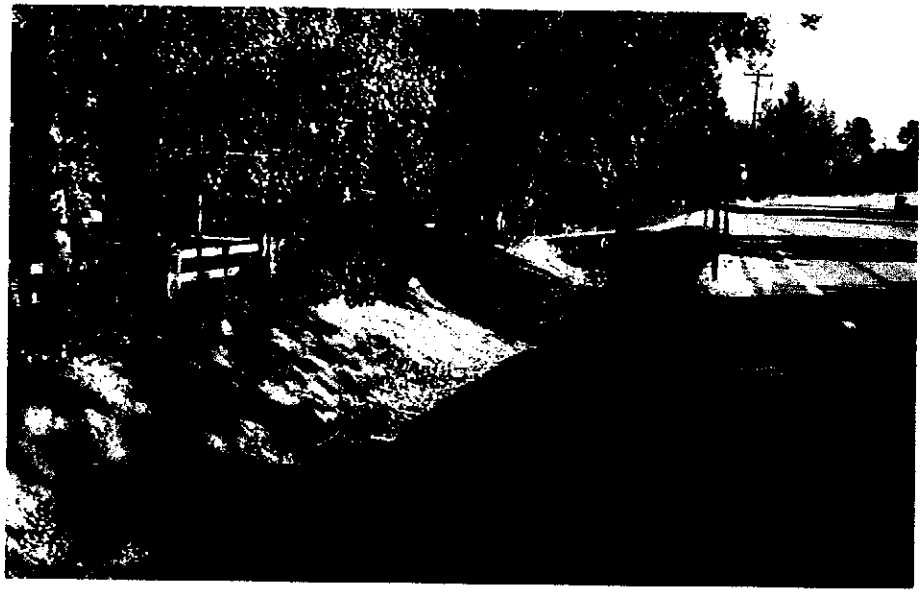
Upstream from the Well site.
All these photos taken 10/31/2000.



Landscaping upstream of the Well site.

Well site and downstream. Dark green foliage of native oaks visible above landscaping.

Driveway just downstream of the Well site. Looking upstream.
All these photos taken 10/31/2000.



Concrete lined stream channel just downstream of the Well site.

Concrete lined stream channel, looking downstream.
Note landscaping.
